

<b>LC Physics and Chemistry</b>	<b>Development Group meeting 10: 02.10.25</b>
	<b>Short description</b>
<b>Agenda item</b>	<b>Notes</b>
<b>Draft strands of study</b>	The group reviewed draft strands three and four of the specification. There was a welcome for the integration of physics and chemistry concepts in strand three and the central role of real-life applications in strand four. Members offered feedback and suggestions for improvements including renaming sub-sections to avoid unnecessary and artificial delineation of learning into physics and chemistry and on ensuring there is a balance between applications of learning within the context of strands 1 – 3 in addition to broader real-life applications that draw on a number of learning outcomes and concepts.
<b>Assessment</b>	The group continued to explore the nature and format of the AAC.
<b>Next steps</b>	<p>Next Meeting: Monday and Tuesday, November 3<sup>rd</sup> and 4<sup>th</sup> 2025</p> <p>The Acting Chair reflected on the work of the meeting and thanked the members for their attendance and contributions.</p>
