Mathematics	Development Group Meeting #11 Short Description	24th September 2025
Agenda Item	**Notes**	
Minutes, Governance	Minutes and no conflicts of interest declared.	
Updates and template	Brief overview and discussion of the purpose of the specification template and of how the strands of study are organised.	
Draft Strand 3 Modelling with Statistics	The task was outlined and discussed, and breakout groups formed to review the draft strand. Feedback included: • Broad welcome for the draft strand with reductions of some areas for OL and refinements at HL. • Statistical literacy was deemed essential, with technology and data supporting it • How best to embed technology in the learning was discussed • The idea of Applied Learning Tasks for changing the way topics could be experienced was discussed, but no consensus was reached • Decision to include some conceptual statistical inference in OL but retain some formal mathematical inference at HL • A separate probability section to be included in the specification	
Next steps	The Chair thanked members for their attendance and active engagement in the meeting. Suggestion to look at specific areas of strand 2 for next meeting, including trig functions, exploring proof through geometry and matrices in the wider curriculum context. The Executive will review the discussions and prepare draft materials for the next meeting. **Next Meeting:** Mon 20th October
