

LC Physics Development Group Meeting #4 23/01/2020

Agenda Item	Notes
Housekeeping, governance, Matters	<p>Minutes clarified, approved and seconded. No conflicts of interest declared.</p> <p>A request was made for minutes and confirmation of next meeting to be circulated earlier in advance of each meeting. Also, discretion and confidentiality was again urged within the workings of the group.</p> <p>Additional 3 Meetings: 27th February, 18th March, 21st April.</p>
Development of draft strand 2	<p>The group was presented the 4 strand structure, the underlying practices and principles. Draft strand 2 (Mechanics) was developed in breakout groups. Some of the discussion in plenary suggested the language could be more accessible, most linkages between the <i>Learn About</i> column and the <i>Able to do</i> column worked but others needed to be tightened or clearer and the inclusion/exclusion of some topics, such as density, pressure, moments, resolving forces in 2D, and some key definitions and experiments needed further consideration.</p>
Development of draft strand 3	<p>The same format was followed for draft strand 3 (Energy Transfer). Some of the discussion in plenary suggested the summary narrative could be more accessible, the concepts in the <i>Learn About</i> column could be more usefully organised, linkages between the two columns strengthened, and clarity given on whether some experiments are to be carried out or the extent to which some ideas to be pursued.</p>
Next steps	<p>Next Meeting Thursday 27th February 2020</p> <p>The chair reflected on the work done and thanked the members for their attendance and contributions.</p>
