

LC Computer Science	Development Group Meeting 9, November 27 th 2025. Short Description
Agenda Item	Notes
Item Two Feedback from consultation	The executive shared slides on the feedback from the online survey, school visits, written submissions and the in-person consultation event. The DG discussed each element of feedback.
Item Three Carousel task and whole group discussion on edits following feedback	The group responded to edits and comments based on the consultation feedback, in order to strengthen the specification. Balance of theory and practical, manageability, coherence and alignment with rationale were all considered. Decisions included more prominence in the specification to making the ALTs the lens for students experiencing the course, re-organising the Computational Thinking and Algorithms sections, tweaking the graphics, and addressing specific technical aspects of the content of the strands flagged in the consultation.
Next steps	The Chair thanked members for their attendance, engagement and commitment at all eight meetings. The Executive will review the discussions and make edits. Next Meeting: 10th December
